Professional Summary

BCA graduate with professional training in Python Full Stack Development, Data Analytics, and exposure to DevOps fundamentals from PySpiders, BTM, Bangalore. Skilled in Python, Django, SQL, Linux, Git, Data Analytics, Excel, Power BI, REST APIs, Docker, Jenkins, Kubernetes, AWS, and frontend technologies. Experienced in data cleaning, exploratory data analysis, visualization, dashboard development, query optimization, and full-stack web application development. Strong problem-solving abilities with a focus on usability, performance, automation, and data-driven decision making.

Technical Skills

- **Programming & Scripting:** Python (Core, Advanced, OOPs), JavaScript, SQL, Shell Scripting/Bash, Linux
- **Frontend:** HTML5, CSS3, Bootstrap, JavaScript
- **Backend:** Django, FastAPI, REST APIs, API Integration
- **Databases:** MySQL, PostgreSQL, Oracle, SQLite
- **Data Analytics:** Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI, EDA, ETL, Statistical Analysis
- **DevOps & Cloud:** Git, GitHub, Jenkins, Docker, Kubernetes, Prometheus, Grafana, AWS, Azure Basics
- **Tools:** VS Code, Jupyter Notebook, Postman, JSON
- **Methodologies:** Agile/Scrum, Full Stack Development, Business Intelligence

Education

- Bachelor of Computer Applications (BCA) | U.S.M.R College, Kuvempu University | 2021 – 2024 | CGPA: 9.25
- Higher Secondary (Science) | MDR Science PU College | 2019 – 2021 | 95.16%
- High School | MDRS | 2014 – 2019 | 92%

Experience

Intern – TestSavvy Company | Jun 2024 – Jul 2024

Blood Bank & Donor Management System (HTML, CSS, MySQL, PHP)

- Built donor & inventory management system, improving efficiency by **60%**. Optimized MySQL queries, reducing data retrieval time by **40%**.

- Developed responsive UI with HTML/CSS for accessibility. Integrated donor matching algorithm, reducing manual effort by **70%**. Implemented role-based access control to enhance data security.
-

Projects

Django Restaurant QR Code Generator | Python, Django, Docker, Kubernetes, Jenkins, Prometheus, Grafana

- Developed a Django web application to generate dynamic QR codes for restaurant menu URLs.
- Implemented CI/CD using Jenkins and deployed with Docker on Kubernetes. Integrated Prometheus and Grafana for monitoring and observability.

SQL Pizza Sales Analysis | MySQL (JOINS, SUBQUERIES, AGGREGATIONS)

- Wrote optimized SQL queries with subqueries, joins & aggregations to analyse sales trends.
- Delivered insights on top-selling pizzas, peak hours, and customer preferences.

Blinkit Grocery Sales Dashboard | Excel (VLOOKUP, HLOOKUP, INDEX-MATCH, Pivot Tables and Charts)

- Performed ETL on grocery sales data and created interactive dashboards with slicers, pivot tables and charts.
- Identified seasonal demand, top-performing products, and areas for inventory optimization.

HR Attrition Analysis | Excel (Data Cleaning), Power BI (DAX, Data Modeling), SQL Server (SSMS)

- Aim to analyze employee attrition patterns and identify key drivers of workforce turnover to support retention strategies.
- Approach consolidated HRIS, Payroll, and demographic data, performed data cleaning in Excel, created relational data models in Power BI, developed DAX measures for KPIs and designed interactive dashboards.

Customer Churn Analysis | Python, EDA, Jupyter, Kaggle, Python libraries (Pandas, NumPy, Matplotlib, Seaborn)

- Performed customer churn analysis using Python libraries to explore and visualize key churn patterns.
- Conducted comprehensive EDA to uncover insights on customer behaviour and factors influencing churn from Kaggle dataset.

Zudio-Inspired Frontend Design | HTML, CSS, JavaScript

- **Developed a responsive Zudio-themed website** using **HTML and CSS**, replicating the brand's layout and design to enhance front-end development skills and UI consistency.
- **Implemented modern web design principles** including **flexbox and media queries** to ensure cross-device compatibility and visually appealing presentation and interactive JavaScript features.
